Happy Birthday to you, too

Periodically delete M# from Master file for deceased residents (Address = -9) This will filter them out of Birthday lists.

Periodically check to be sure the last name in Master list is also in Birthday list. If not, extend the Birthday spreadsheet, which should bring across the missing names.

When new residents are added to end of Master file, **before** they are sorted in, add rows to Birthday **UNFILTERED** file to copy them in. Then sort each file.
